Clipboard Viewer is a free software which can be used to view clipboard contents. You can paste data, including files, images, videos, links and so on into Clipboard Viewer. When you pasted something, you can view multiple things which have been put into clipboard in different views. For instance, you can view all text, all images and URLs. Clipboard Viewer has two main views. One view is an image viewer and the other is a text viewer. In the image viewer, you can view multiple items as a picture. You can view a single item by mouse hovering. In the text viewer, you can view multiple items as a text. You can copy and paste text. You can view the source code of text by pressing F3. Furthermore, the software can add the "handles" for all items you are viewing (by pressing F2). You can also view the "handles" for all items in clipboard. Please Note: Clipboard Viewer is a light

clipboard manager. Sometimes, it uses more memory or system resource than it should use. You can use the option to limit the memory/resource by asking it to store only last n copies. If that works for you, you can use it. If not, it will work in most cases. Try the free version before purchasing. Added to that, you can copy any URL from the clipboard and paste it to your favorite web browser to launch it or go to that URL. The screenshot attached above shows this in action. The URL in the clipboard was copied and then pasted to Google Chrome. And to add any URL to clipboard, you just need to press Ctrl + U or select the URL from the image viewer and click the Paste icon and Ctrl+V for Google Chrome.
